

## Partner Search Service at a glance

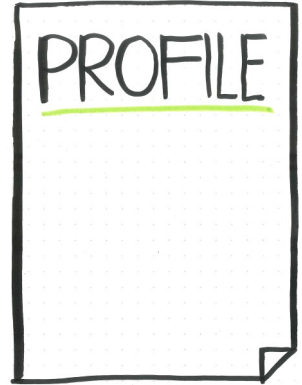

We support **researchers** and **entrepreneurs** from Lower- Saxony in their search for cooperation partners abroad.

Together we create a **search profile** to find international partners for research, technology transfer or business partners.

The following types of profiles can be utilized:

- ◆ Business Offer | Request
- ◆ Technology Offer | Request
- ◆ Research & Development Request

**R**  
**E**  
**V**  
**I** **nternal**  
**E** **xternal**  
**W**

The profiles must meet the **criteria** defined by EEN. The **quality control** of the profiles is conducted in a two-step procedure.

After the review process is completed, the profile is published in EEN's **Partnering Opportunity Database** (POD). Here it is accessible to customers and EEN employees and therefore has a wide reach.

Profiles are **disseminated** through various channels, such as profile queries, newsletters, the EEN forums or the various sector groups.

In response to a profile you will receive an "Expression of Interest" (**EOI**) from interested partners.
